CloudEmployee
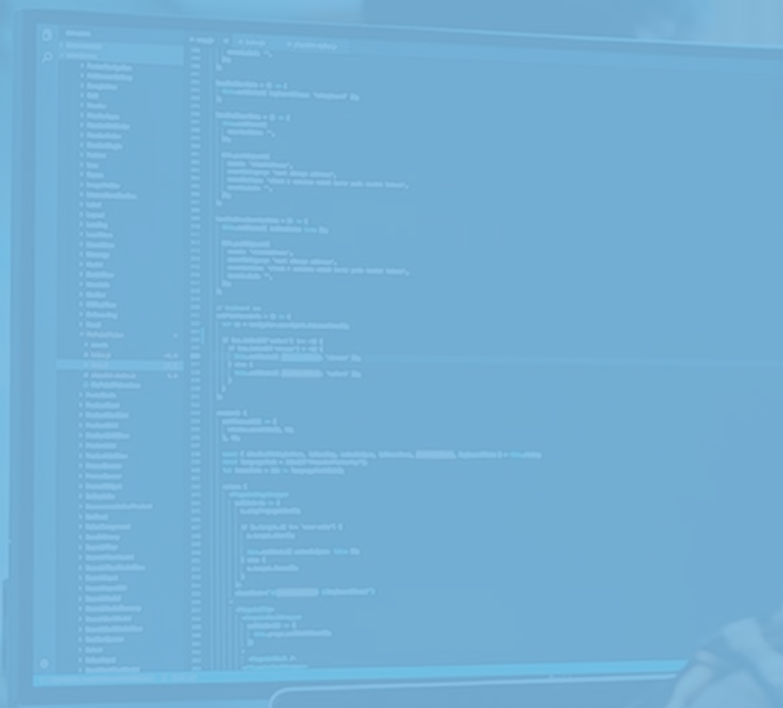

PHP Symfony Developer
(Senior level)

PHP Symfony Developer (Senior level)

Cloud Employee is a fast-growing UK-managed offshore recruitment and staffing company in the Philippines. We tackle the growing global IT skills shortage by connecting tech companies based in Europe, the US, and Australia to our pool of expert software developers in the country.

We're looking for a skilled and driven PHP Developer to join our ever-expanding team of expert IT professionals. This is an excellent opportunity to work with some of the world's exciting start-ups in a multinational environment while enjoying a number of benefits and perks which include, but are not limited to, medical and dental plans, training allowances, free food, as well as regular activities that aim to bring employees together.

The Position

The successful Senior PHP Developer will be tasked to:

- Build and maintain Wren's custom-built, cutting-edge applications (Symfony 3/4 based)
- Write clean code that is clear and understandable by others
- Contribute to project specifications and estimations
- Contribute to all phases of the development lifecycle
- Work with business stakeholders and the development team to understand the initial scope for a new project
- Mentor and support junior members of the team

Candidate Requirements

Experience and Knowledge

Essential:
- At least 4 years' experience in creating and maintaining object-oriented PHP 5/7 based systems
- Experience of using the Symfony 3, Symfony 4 or equivalent framework
- Experience of working with MySQL 5+
- Demonstrable knowledge of web technologies including HTML, CSS/LESS or SASS, JavaScript and Ajax
- Experience of using Version Control systems such as Git as part of a team

- Knowledge of the Symfony 2, Symfony 3 or equivalent framework
- Knowledge of the Doctrine 2 ORM
- Experience in creating and maintaining RESTful APIs and JSON
- Experience of automated testing (preferably PHPUnit and Behat/Selenium)
- Experience of automated testing (e.g. Behat)
- Design patterns knowledge and practical experience implementing them
- Experience of Agile project methodologies and its impact on iterative design
- Experience of working in a continuous integration environment
- Familiar with Linux or Mac OS

Desirable:
- Experience of retail and/or manufacturing environments and processes

Skills & Attributes

Essential:
- Excellent communication skills–must be able to describe technical issues to a non-technical audience
- Ability to mentor and support more junior members covering technical and non-technical skills
- Highly proficient in both spoken and written English
- Ability to work as part of an Agile team
- A passion for adhering to coding standards and clean code
- Has a keen eye for detail

Desirable:
- Has previously worked for a retailer and knows retail processes

Education & Qualifications

Desirable:
- Degree-level educated
