CloudEmployee

#Beyond Off-shoring

We are your off-shore in-house solution.

Cloud Employee Ltd is a UK company that specializes in supplying dedicated Mobile, Web and Software Developers to start-ups, SMEs and blue chip organizations across UK, Europe, Australia and the US. All Cloud Employees work from our state-of-the-art well equipped offices located in the Philippines.

Cloud Employee is here to bridge the gap between your company and highly skilled remote employees. We are able to give you access to a new pool of IT talent whilst saving you money and allowing you to grow your business.

No Long-Term Contracts

Zero Risk Trials

Zero Recruitment Fees

Beyond Benefits

Direct reporting during your office hours

Managed operations: HR and Payroll, equipment and software

Onsite Account Managers and dedicated Aftercare Team

How it works

1 Start searching
We take your job description and customise a local search finding you the best candidates to suit your role.

2 Candidate shortlist
You review a shortlist of screened CVs and select your candidates for Skype interviews and free technical trials.

3 Work together
Once satisfied, your Developer commences work reporting to you daily as a direct extension of your team.

4 Regular updates
Your Developer will have regular 5 appraisals with the on-site Community Director on your behalf.

5 Let's grow together
We manage operations. You grow your team and your business.

Cloud Employee actively fosters long lasting professional relationships, resulting in a dedicated and motivated team that feels pride and responsibility in their work.

Our talented people.

When it comes to hiring tech talent we believe you should be able to tap not only your local options but also the best the world has to offer. With advanced communication technology today and productivity techniques, great working relationships through collaborative remote work is not unheard of. **Cloud Employee** connects you with skilled software developers in the Philippines.

OUR DEVELOPERS ARE SKILLED

HTML 5   Wordpress   Joomla   Android

PHP   Javascript   IOS   Drupal

Karen
Skilled Wordpress developer

The main issues we have is getting the IT staff that we need quickly and being able to develop quickly the products and services that we want to make. We've had some business and product ideas that we've been wanting to make for many years now. With our developers at Cloud Employee, we've been able to push those out a lot quicker, a lot sooner. And we've been growing our customer base because of that, which is fantastic.

Paul Baka (CEO) Keyko
What Our Clients Say.

Our Cloud Employee Account Manager was there to handle each of my individual concerns as I raised them. Since taking on our Cloud Employees, our ability to deliver product has greatly improved.

Bobby Williams (Chairman) Loyalty Logistix

We have successfully released a major version of our main software product during a critical period for us. We have done this with a qualified improvement in the extent and depth of testing, whilst being subjected to an abnormally high workload with the UK and Cloud Employee team working in tandem each day.

James Stringer (MD) CleanLink Software Ltd

Beyond value...

To further foster our Client / Cloud Employee team relationships, we offer clients with teams of 3 (Minimum) an expense paid trip to the Philippines. Clean Link's MD James came to the Philippines in November 2017. Watch his short video below to see clips from his trip and hear about his experience working with Cloud Employee.

On my first day here, when I came to the office it immediately struck me what a happy office it is, everybody seems very content but also very busy. Equipment's really good and the welfare, the facilities for the staff are excellent. That gives me peace of mind that I know my guys are happy here.
James Stringer, MD, Clean Link

Wherever your business, whatever your development needs we can provide the right skills for your job.
