

CloudEmployee

#Beyond Offshoring

Hire the best developers for your job.

#Beyond Offshoring

We are your offshore in-house solution.

Cloud Employee Ltd is a UK company that specialises in supplying elite developers to start-ups, SMEs and bluechip organisations across UK, Europe, Australia and the US. All Cloud Employees work from our state-of-the-art British managed offices located in the Philippines.

Cloud Employee is here to bridge the gap between your company and highly skilled remote employees that join as an extension of your team. We are able to give you access to a new pool of IT talent whilst saving you money and allowing you to grow your business.

Beyond Benefits

Direct reporting during
your office hours

Managed operations: HR and
Payroll, equipment and software

Onsite Account
Managers and dedicated
Aftercare Team

1

Start searching

We take your job description and customise a local search finding you the best candidates to suit your role.

2

Candidate shortlist

You review a shortlist of screened CVs and select your candidates for Skype interviews and free technical trials.

3

Work together

Once satisfied, your Developer(s) commence work reporting to you daily, your office hours as a direct extension of your team.

4

Performance management

Your Developer(s) will have regular performance appraisals with you and the on-site Account Manager.

5

Let's grow together

We manage operations. You grow your team and your business.

How it works

Cloud Employee actively fosters long lasting professional relationships, resulting in a dedicated and motivated team that feels pride and responsibility in their work.

Cloud Employee

English speaking IT professionals in the Philippines,

What Our Clients Say.

Our Cloud Employee Account Manager was there to handle each of my individual concerns as I raised them. Since taking on our Cloud Employees, our ability to deliver product has greatly improved.

Bobby Williams (Chairman) Loyalty Logistix

The way the staff are looked after and valued, the availability of Cloud Employee management and their expertise and ability to source staff means that we would be happy to recommend them to other businesses.

Harry Boxall - SafeLink UK

Watch Video Testimonial

We have successfully released a major version of our main software product during a critical period for us. We have done this with a qualified improvement in the extent and depth of testing, whilst being subjected to an abnormally high workload with the UK and Cloud Employee team working in tandem each day.

James Stringer (MD) CleanLink Software Ltd

Beyond value...

To further foster our Client / Cloud Employee team relationships, we offer clients with teams of 3 (Minimum) an expense paid trip to the Philippines. Clean Link's MD James came to the Philippines in November 2017. Watch his short video below to see clips from his trip and hear about his experience working with Cloud Employee.

On my first day here, when I came to the office it immediately struck me what a happy office it is, everybody seems very content but also very busy. Equipment's really good and the welfare, the facilities for the staff are excellent. That gives me peace of mind that I know my guys are happy here.

James Stringer, MD, Clean Link

Wherever your business, whatever
your development needs we can
provide the right skills for your job.
